MATHS PUZZLE

Solution to last week's puzzle:

This week's mindbender:

Alex is crossing the desert with his dog, Lucky. He starts off with a full waterbottle and drinks $\frac{1}{2}$ of the contents during the first day. He then lets $\frac{1}{3}$ Lucky drink half of what is left.

The next day, Alex drinks a $\frac{1}{4}$ of what has been saved from the previous day. What fraction of the original amount did he save for Lucky?
